Career Path Training: Jr. Network Engineer

The Jr. Network Engineer course will prepare students with the skillset that will allow them to perform on the job. This training's primary focus is on providing the student hands-on training with Cisco Routers and Switch Training instrumental in securing their first DoD IT Job. This course is 100% hands-on Network training. Students will learn how to build EIGRP and OSPF Networks, configure IP Addresses on devices, wire the devices, create VLANs and more.

Jr Network Engineer is responsible for working with a team of engineers managing the entire computer network of a company. They are responsible for making sure the systems are functioning as intended. A network engineer must link all computers with the central computer and ensure that all programs and files are available to each computer as necessary. They must also link computers to machines such as fax machines, printers, and telephones. Communication device management such as cellular phone maintenance also falls under this job description. The network engineer is responsible for developing, installing, updating, and maintaining everything associated with the network including upgrading software and hardware and incorporating new devices.

2020 Weekday Schedule

Jr. Network Engineer	Start Date	End Date	Time
Winter	January 6, 2020	February 28, 2020	9 am to 4 pm Monday - Thursday

Fall	September 19, 2020	November 7, 2020	9 am to 1 pm Saturday

Career Path Training: Helpdesk Specialist

The Helpdesk Specialist course is 100% hands-on training. This three-week course prepares students with Helpdesk skillset that allows them to perform successfully on the job. The focus is to provide students with hands-on training instrumental in securing their first IT job.

These courses assume you are familiar with using personal computers, mouse and keyboard (basic typing skills are recommended). You should be comfortable in the Windows environment and be able to use Windows to manage information on your computer. Specifically, you should be able to launch and close programs, navigate to information stored on the computer and manage files and folders.

Career Path Training: Cyber Security - RMF

This course will provide an in-depth and relatable form of job instruction training that is solely based on the Risk Management Framework (RMF). The training includes in-class hands-on exercises and take-home assignments that will demonstrate the process for identifying, implementing, assessing and authorizing information systems.

Training is industry-driven, meaning, training will only cover process steps as identified in the RMF, and an employers' expectation of the compliance professional.

Upon completing the training, trainees will be able to:

- Understand the basics of Network Security and System Environment.
- Understand FISMA/FedRAMP
- Explain the RMF steps and processes
- Perform Information System Security Officer (ISSO) responsibilities
- Assessor responsibilities

Career Path Training: Administrative Assistant

Coming Soon

Certification: Security Plus

The MDTS Security+ Certification is a vendor neutral credential. The Security+ exam is an internationally recognized validation of foundation-level security skills and knowledge and is used by organizations and security professionals around the globe. The CompTIA Security+ exam will certify that the successful candidate has the knowledge and skills required to identify risk, to participate in risk mitigation activities, and to provide infrastructure, application, information, and operational security. In addition, the successful candidate will apply security controls to maintain confidentiality, integrity, and availability, identify appropriate technologies and products, troubleshoot security events and incidents, and operate with an awareness of applicable policies, laws, and regulations

Certification: CCNA

Introduces the principles and techniques necessary for network engineers. Training will provide the student with the ability to build EIGRP and OSPF Networks, Configure IP Addresses on devices, wire the devices, create VLANs and more.

Prerequisite for this course: A High School Diploma or Equivalent

This course will prepare you for your CCNA certification. Once certified, you will have the skills and certification to install, maintain and troubleshoot small networks or a branch of an enterprise network, and implement basic network security.
